

Job Description: MERN Stack Developer (Fresher)

Position

Junior MERN Stack Developer

Experience

0 - 1 Year

Location

Remote / On-site

Employment Type

Full-Time

About the Role

We are looking for a passionate and motivated MERN Stack Developer (Fresher) to join our dynamic development team. You will be involved in designing, developing, testing, and deploying web applications using MongoDB, Express.js, React.js, and Node.js.

Responsibilities

- Assist in building and maintaining scalable web applications using the MERN stack.
- Write clean, maintainable, and efficient code.
- Integrate RESTful APIs and third-party services.
- Collaborate with the design and backend teams to improve usability.
- Participate in code reviews, testing, and debugging.
- Stay up-to-date with emerging technologies and best practices.

Technical Skills Required

- Strong understanding of JavaScript, HTML5, and CSS3.
- Basic knowledge of React.js, including functional components and hooks.
- Familiarity with Node.js and Express.js for server-side development.
- Understanding of MongoDB and basic CRUD operations.
- Ability to use Git for version control.
- Knowledge of REST APIs and how to consume them.
- Understanding of JSON, Axios, and asynchronous JavaScript (Promises, async/await).

Good to Have (Optional)

- Familiarity with tools like Postman, VS Code, Webpack, or Babel.
- Exposure to Redux or other state management libraries.

- Basic understanding of deployment using services like Render, Vercel, or Heroku.
- Side projects or GitHub portfolio showcasing MERN stack work.

Soft Skills

- Good problem-solving and debugging skills.
- Willingness to learn and adapt quickly.
- Team player with strong communication skills.
- Attention to detail and a passion for web development.

How to Apply

Send your updated resume, GitHub profile (if available), and a short paragraph about your recent project to: careers@techstartup.com
